

Do you consider yourself a:

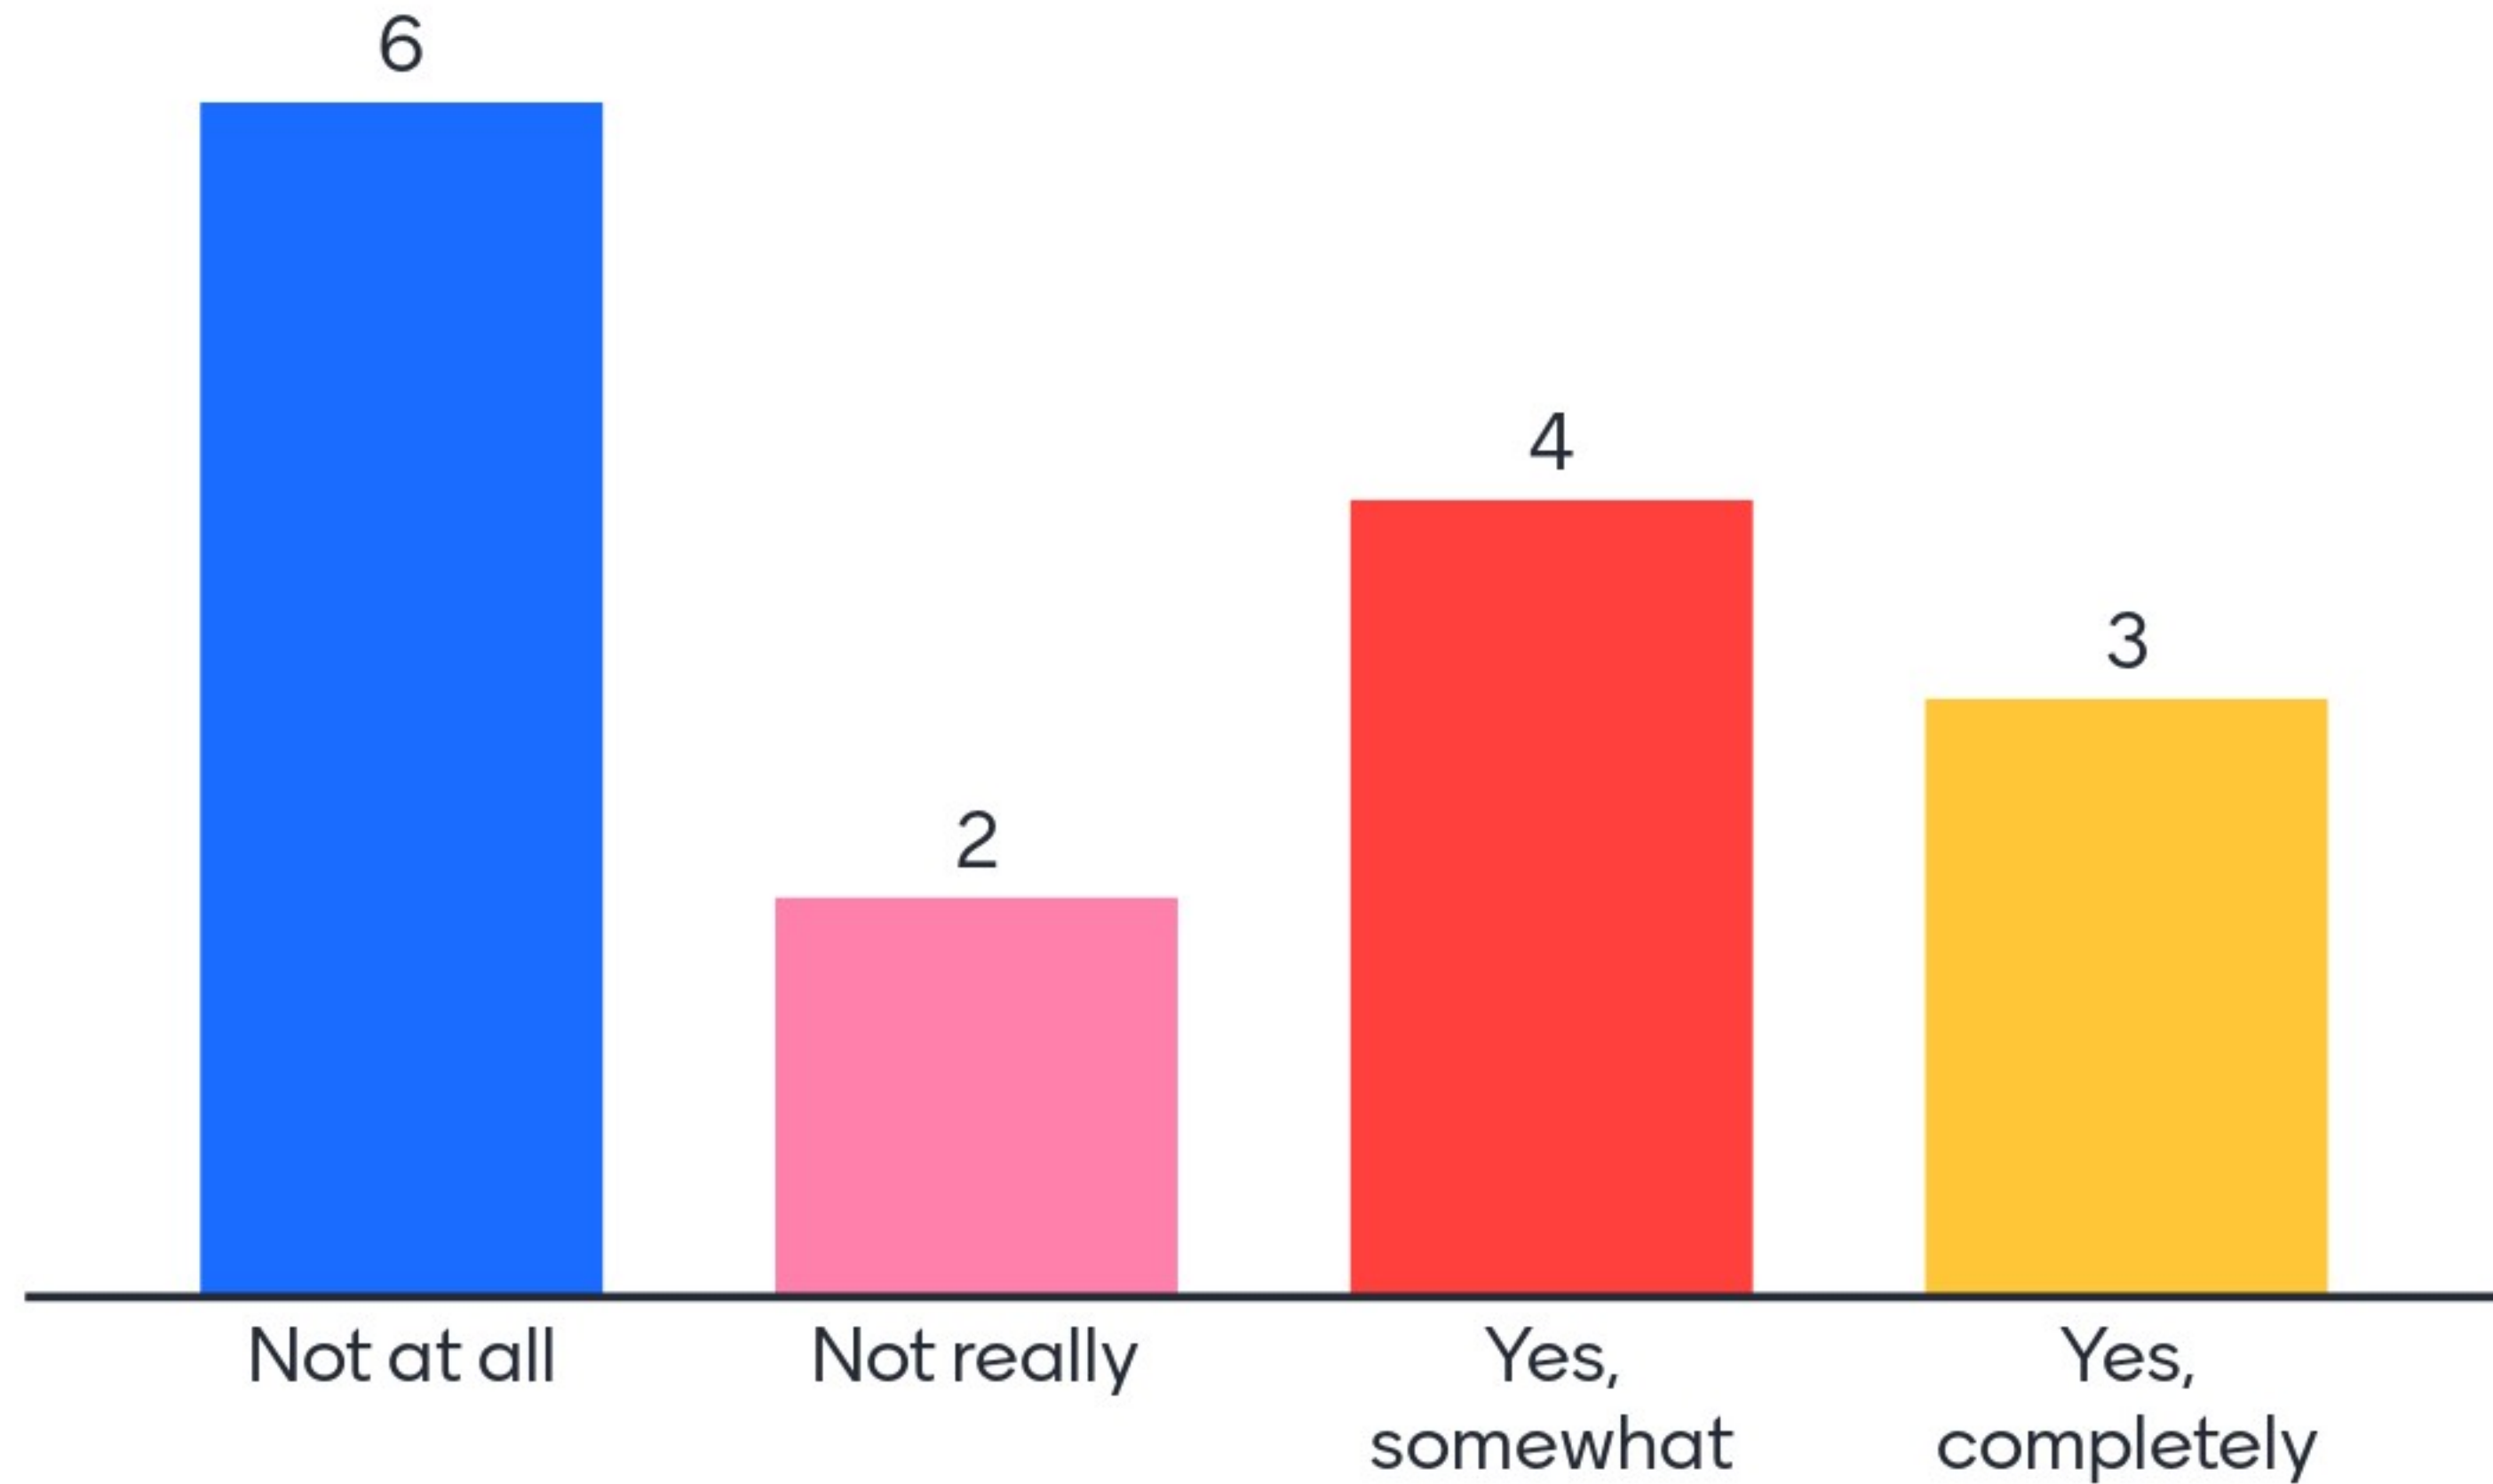

Are you aware of the EXISTENCE of the FNSSA Roadmap?

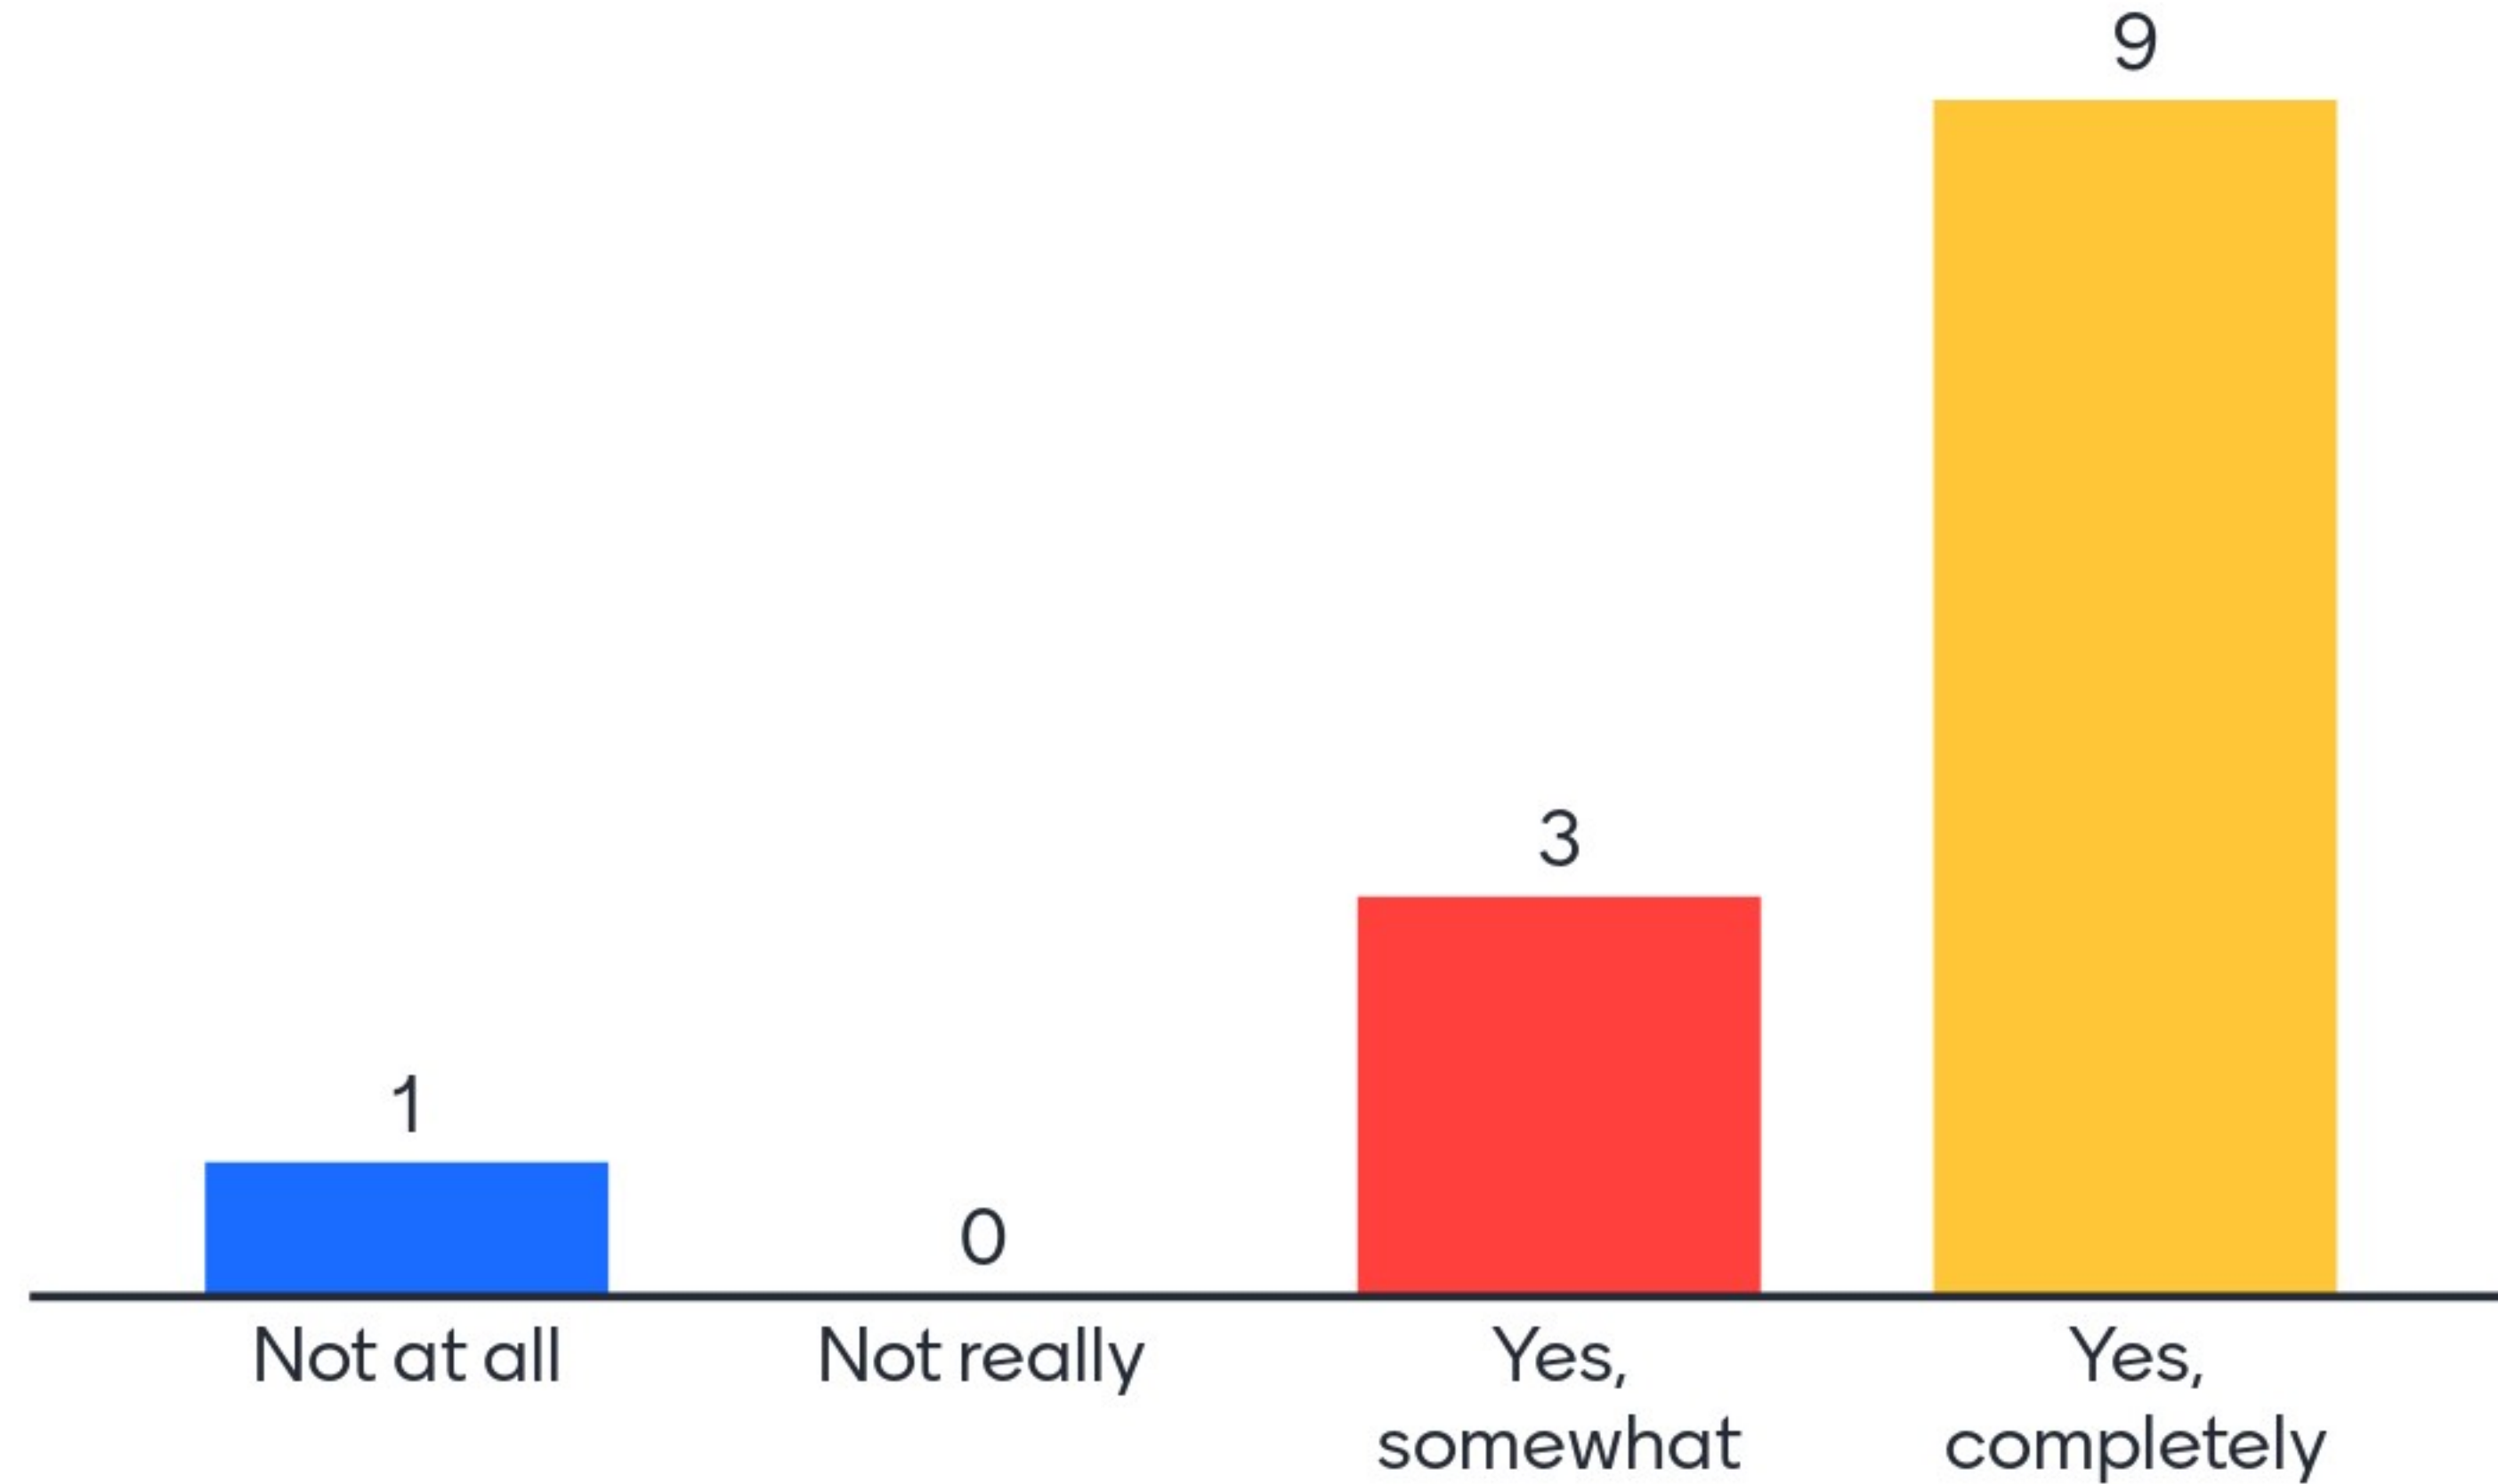

Are you aware of the THEMES of the FNSSA Roadmap?

Were you aware of the (LEAP4)FNSSA project database existence?

Do you recognise the need for such a FNSSA project database?

Which of your NEEDS should be fulfilled by a future KMS of the FNSSA platform?

Inclusion of community voices in preparing research and intervention actions

To enable us better to better organize the information/documents. It also allows for easy access of information.

Immediate access for better decision making on the spot

Match Making Opportunities and Networking

A dashboard of past and ongoing projects with geo-referenced institutions and perhaps georeferenced collaboration linkages?

Ensure tools for research and communication with communities should be simplified and community-centric

Accessibility of the data by everyone

Tool to search for individuals with specific knowledge.

Access to Project's PI name with his consent ; results report; data collected and generated for other to reuse

Which of your N E E D S should be fulfilled by a future KMS of the FNSSA platform?

A platform for crowdsourcing AR4D project information in Africa

It should have information that is representative of the partners. In other words, information that would be relevant to the partners.

clear and helpful metadata

A future KMS could provide information in formats easily to understand in practice. Of course this excludes pure project information. Also for sure this requires a lot of resources.

develop the mobile phone interface

Develop the mobile phone interface

Data taking into account gender aspect

Science-based research outputs to inform policy to increase food safety.

Ask easy to understand questions

Which of your NEEDS should be fulfilled by a future KMS of the FNSSA platform?

Science-based research outputs to inform policy to increase food safety.

Features for sharing on social networks

How will a future KMS for the FNSSA platform become more **A T T R A C T I V E** ?

A KMS is attractive, if constantly updated. And this requires that such a service is well budgeted.

Use Plateau or Infographics as interface to encourage exploration of data

Take advantage of existing innovative works that can help inspire more action example of NEYAT youths are doing in West And central Africa

If it's linked to a broader understanding and practice of communication aside of the digital sphere.

it must be take advantage of existing networks of KM managers to strengthen collaboration and build synergy

I will be glad to lead some examples using my revered works as lead of NEYAT

Attraction begets attraction. We need passion, realistic approaches and content that is very representative of peoples aspirations

Blog stories from people who have used the system for their work
